

Hamid Fattahi

Cross-platform Product Developer & Moonlancer Co-founder

I design and build operational products across web, desktop, and Android. Since 2023, I have also been building Moonlancer with friends as a side venture focused on custom retail software: POS, payment, credit and BNPL journeys, self-service kiosks, and back-office control. I use React and Next.js for web products and Rust with Tauri for secure, efficient store-edge applications.

 Tehran, Iran

What I can help you with

-  Custom POS and offline-first store applications
-  Payment, wallet, credit, and BNPL product flows
-  Self-service kiosk and assisted checkout interfaces
-  Retail control centers, ERP integration, and device operations

CROSS-PLATFORM RETAIL DELIVERY

One product family. Every retail surface.

Through Moonlancer, I shape a shared product language for cashiers, customers, store managers, and central operations without forcing every device into the same interface.

01

POS & store edge

Offline-aware checkout, local device control, peripherals, updates, and recovery.

Rust + Tauri · Linux / Windows / Android

02

Payments & BNPL

Payment, wallet, credit, installment, refund, settlement, and exception flows.

React + TypeScript · POS / Web / Mobile

03

Self-service kiosk

Touch-first catalog, ordering, payment, accessibility, and assisted recovery.

Tauri · Linux / Windows / Android

04

Operations control

Store and device health, inventory, rollout, reporting, and ERP workflows.

Next.js · Web control center

EXPERIENCE

My professional background

2023 - Present	Co-founder & Cross-platform Product Developer Moonlancer Side Venture · With friends Co-founded Moonlancer with friends as an independent side venture. I lead its retail product direction and build the delivery foundation for custom POS, payment, credit and BNPL, self-service kiosk, ERP integration, and operational control products across web, Linux, Windows, and Android.
January 2025 - Present	Frontend Developer Aldy Full-Time Built DailyMarket and WallMarket backoffice panels, logistics PDA apps, and Aldy marketplace admin and seller interfaces. Contributed to WPG payment products, BNPL, loan, and wallet flows.
December 2023 - Present	Frontend Developer DESNA CO Full-Time Built BAT route planning and survey interfaces, Unilever B2B ordering, RoyalJeans commerce pages, and GhajariFood delivery and zone-pricing tools.
November 2019 - December 2020	WordPress Developer Niklink Agency Agency Developed responsive WordPress websites for Nik Yazd Holding and its subsidiaries, including PPNY, Nikpu, and Nikbaspar. Implemented Figma designs and worked on SEO fundamentals.
August 2016 - December 2019	Full-stack Developer Kiasoren Internship Developed web programming foundations through mentored work in WordPress, frontend development, PHP, SQL, algorithms, and deployment concepts.

SELECTED PROJECTS

A selection of my work

01

Moonlancer

A side venture co-founded with friends to create connected software for large retailers: store-edge POS, payment and credit/BNPL journeys, self-service kiosks, ERP and inventory integration, and central operations.

Rust / Tauri / React / Next.js / TypeScript / Linux / Windows / Android

Visit project

02

Aldy Marketplace

Marketplace and commerce interface work spanning platform migration, admin tooling, and seller workflows.

Visit project

03

GhajariFood

Catering platform with internal delivery management, zone pricing logic, and sales operation tools.

Visit project

04

Niklink Agency

Agency website and client delivery experience tied to WordPress and SEO-focused implementation.
